

# HCD Overview Internal Cladding System

HygienaClad

**Antimicrobial hygienic cladding  
for all environments.**

HygienaClad HCD hygienic wall finishes range provides a wide range of options to the user, that is easy to maintain for a wide range of environments.

The HCD range includes the following;

- HCD Standard White
- HCD Aesthetic Range (High gloss colours)
- HCD Enhanced Range (With Silver Ion Technology)
- HCD Natural range (Natural subtle colours)

With all the HCD products the surface finish is smooth, making it easy to clean and being U-PVC makes it impervious to moisture. It is ideal for a wide range of applications such as showers, kitchens, changing facilities, laboratories, toilets, food preparation areas etc.

Installation is fast, as all the products in the HCD range are 2.5mm thick and manufactured from high quality raw plastic into 1220mm wide sheets and are available in 2500mm or 3000mm lengths. Once installed, within a few hours equipment can be re-installed minimising the down time for the end clients or main contractor.

The sheets are typically joined with a two-part trim that is colour co-ordinated with the colour of the sheet. Internal and external corners are usually thermoformed on-site, so the sheet follows the contours of the building. This significantly reduces the number of joints and maximises the hygienic integrity of the system. All sheets are fully bonded to the building substrate using a two part polyurethane adhesive, giving high bond strength. In food preparation environments the sheets being fully bonded preventing infestation behind the sheets.

A number of different trim detail is used to cover all installation types and different floor finishes.

The majority of installations use the HCD white for kitchens and shower areas, the white fits in with the majority of other finishes.

The HCD range is certificated against fire and meets the requirements of BS476 part 7 class 1 and BS476 part 6 Class 0 depending upon the building substrate that the material is adhered to.

If a swatch is required then please feel free to request a sample either directly from our offices or through our website.
