

Splashback Guide for HCD and Altro Ranges

Internal Cladding Systems

HygienaClad

**Antimicrobial hygienic cladding
for all environments.**

Hygienaclad can manufacture custom splashbacks from any of the product ranges shown below;

Altro Ranges	HCD Ranges
Standard White	Standard White
Chameleon	Aesthetic
Illusions	Enhanced
Satins	Natural
Stone	

Splashbacks are manufactured from the available sheet sizes and we provide all joining strip as well as edge finishing strips in colour co-ordinating material. If the joints need to be in a particular position then these should be indicated on the Splashback Drawing page (*Please note that joins in particular places may increase the price due to material wastage*)

If the splashbacks includes internal / external corners, we can offer two solutions;

- Provide preformed corners from the material selected and these are joined using the standard jointing strips.
- Provide internal / external two-part trims for the Altro Range of products only (subject to availability)

Please complete all the details on the form so that a tailored price can be calculated for your specific requirements.

- As kits we can only offer trim detail as the jointing method, welding needs specialist equipment and skilled operators. If you need welded joints then please feel free to use the form but we will need to carry out the installation and the price include installation as well in this instance.

We will supply a complete kit of parts based upon your information as well as adhesive and mixing paddles.

If you have multiple splashbacks of different sizes then please make multiple copies of the Splashback Drawing page and attach with this definition page.

Splashback Drawing & Measurements

Please Sketch on the Splashback Drawing page a plan view of the Splashback- showing all internal / external corners of the splashback.

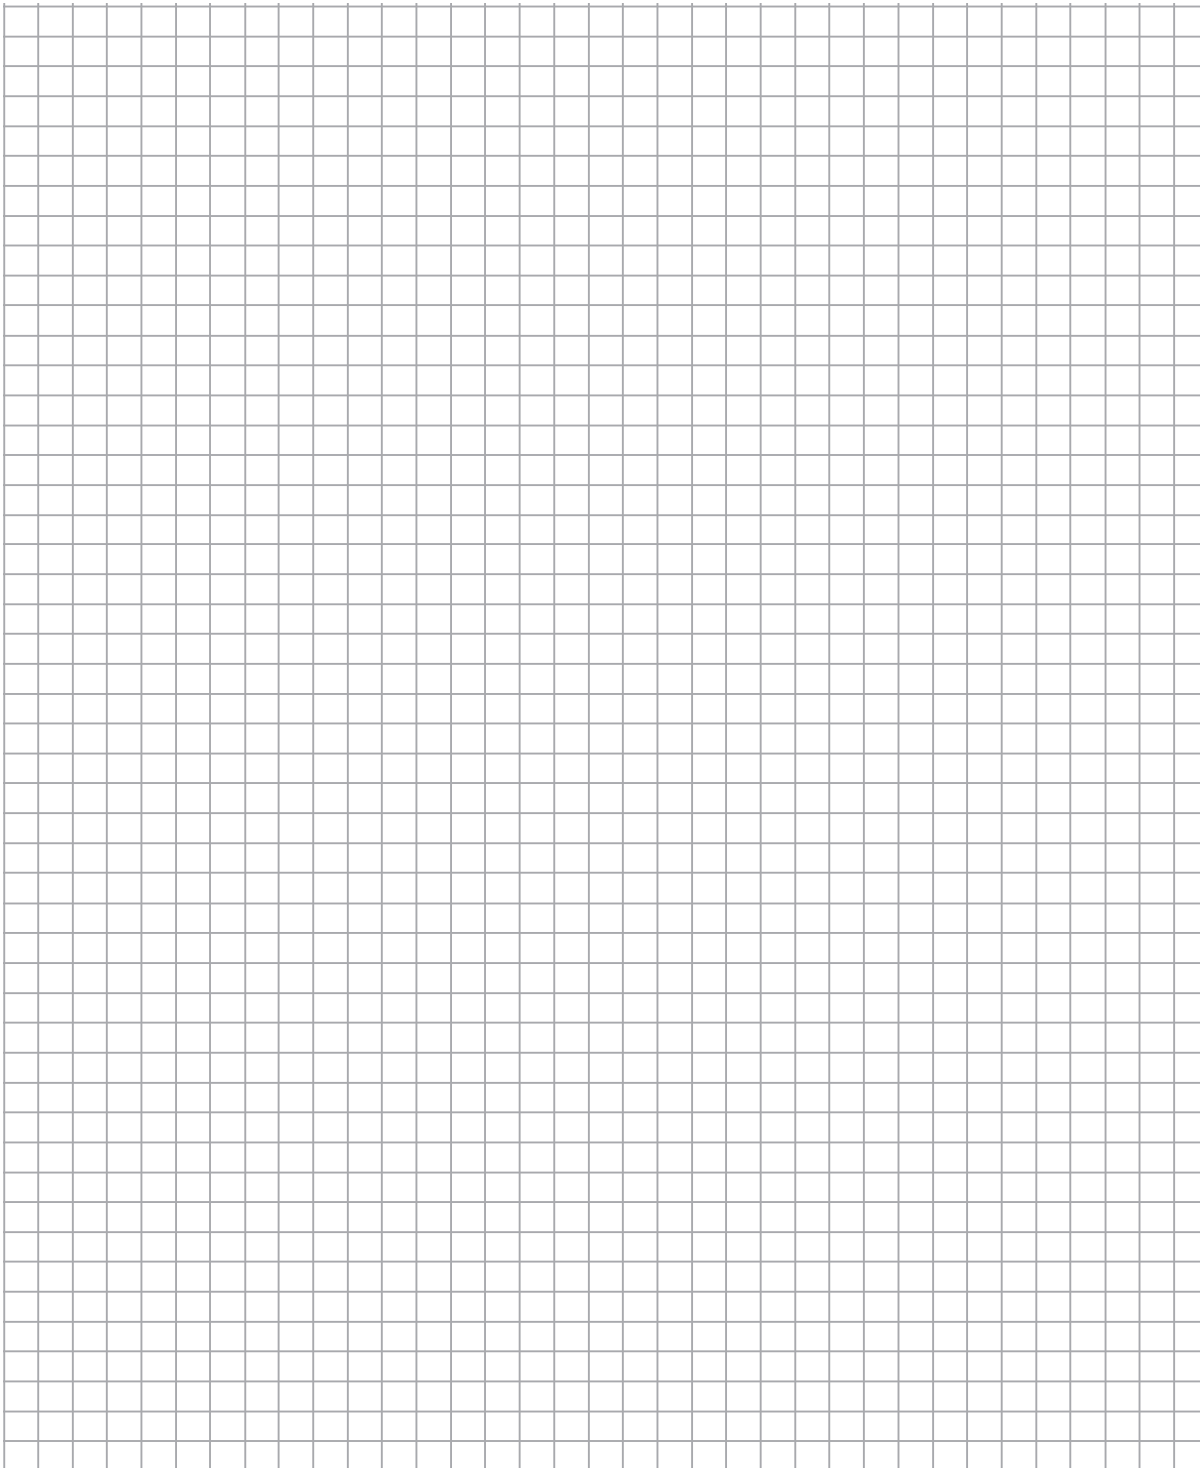

Please provide the following measurements;

- Total length of Splashback.
- Height of Splashback (if it varies over its length then please draw a front elevation showing heights.
- Total number of Internal Corners (No.=) Corner Style (Trim / Pre-formed)
- Total number of External Corners (No.=) Corner Style (Trim / Pre-formed)
- Total length of Splashback that requires Start Edge Trim (Start Edge Trim should be used on every edge of the Splashback does not have any abutment. (Length of Start Edge Trim = metres)
- Intersheet Joins (Trim / Welded)
